

Jokin Oteiza Ollo

About me

Software Engineer and Videogame Developer focused on graphics and gameplay programming. Driven by a commitment to clean, optimized architecture and backed by extensive academic honors in real-time rendering and game programming. Highly adaptable and open to international opportunities.

Education

Software Engineering (USJ)

2021-Present (Expected June 2026)

Videogame Design and Development (USJ)

2021-Present (Expected June 2026)

Honors in: Game Engines, Computer Graphics, Multiplayer Games, Real Time Rendering, AI for videogames, Linear Algebra and Calculus, among others

Experience

Game Programmer Internship at Kraken Empire

November 2025 - January 2026

Worked on the sequel to Toy Tactics - Unity, C#

Ported gameplay elements from Toy Tactics to the new title

Developed emergent gameplay systems and interactions

Adapted levels designed for Toy Tactics to be played on the sequel

Tested and balanced levels

Projects

FFT Ocean Simulation - In development

2026 - C++, DirectX 11, HLSL

Ocean surface simulation using oceanographic spectra and FFT.

Deep use of tessellation, GPGPU and other rendering pipeline stages

The Last Crusade - In development

2026, team of 4 - Unity, C#

Contributed to game design

Implemented the UI

Implemented the combat system

Implemented the enemy combat AI

Idle Crimes Tycoon Mafia Sim - Available in Google Play.

2024, team of 3 - Unity, C#

Contributed to game design

Implemented the UI

Implemented Unity Ads

Implemented the gameplay systems

Developed the save system

Led the publishing process in Google Play

Anima - Available in itch.io

2022, team of 5 - Unity, C#

Contributed to game design

Implemented boss combats

Implemented the enemy AI

Implemented the UI

Achievements

Honors in 17 university subjects

Several University videogame awards, including:

Best 2D Game - The Last Crusade (2D RPG, not released yet)

Best Elevator Pitch - Anima (2D Platformer, available in Itch.io)

Honorary Mention - Rebellion (Asymmetric 3v1 board game)
